Summary

Remote help desk candidate who troubleshoots under pressure, communicates clearly, documents fixes, and improves workflows — aligned with mission, communication, customer while delivering supported experience in Ticketing / ITSM, PST / time-zone coverage. Service Desk Technician - Digitech - Remote candidate with 3 years of self-directed technical learning and hands-on technical operations support across desktop support, Windows OS troubleshooting, PC hardware, and business application support. Experienced with Ticketing / ITSM workflows: assessing support requests, documenting actions taken, following up, and escalating when needed. Creates knowledgebase documentation, SOPs, and runbooks; brings remote administration, network troubleshooting, and data privacy/HIPAA awareness from technical operations and Army medical service.

Experience

BEAT THE BOMB, Technical Operations Manager

Philadelphia, PA
Sept 2024 – Mar 2026

- Provided front-line support for NUC kiosks, Windows endpoints, Linux Photon servers, CCTV, RFID, DMX, Dante audio, OBS, and customer-facing systems.
- Supported NAS backup/file restores and ran handed MySQL scripts/reports for escalation; used RustDesk for remote administration.
- Assessed live hardware, OS, network, and application issues; gathered details, documented actions, and escalated or restored service under time pressure.
- Handled help desk ticket requests in Ticketing / ITSM workflows with clear verbal communication and follow-up through resolution.
- Created SOPs, runbooks, and knowledgebase-style documentation for recurring fixes and onboarding workflows.
- Performed PC hardware repairs and replacements, including motherboards, RAM, GPUs, drives, servers, cameras, and displays.
- Reduced guest transition wait time 75% (10 min to 2.5 min)
- Supported 20-30 staff per shift
- Supervised 20-30 team members on shift

1-800-GOT-JUNK, Junior Operations Coordinator

NJ/DE Region
Mar 2019 – June 2021

- Used Salesforce at user level to log jobs, look up customers, confirm appointments, and maintain job notes.
- Responded to customer issues across phone, field, and dispatch contexts while coordinating with drivers, customers, and management.
- Coordinated scheduling, routing, dispatch, service completion, and vendor logistics across NJ/DE service zones.
- Earned promotion from Helper to Driver after three months, then to Junior Operations Coordinator around Sep 2020.
- Resolved disputes and pricing negotiations face-to-face while protecting service completion and customer experience.
- Reduced lost-job rates by approximately 15%
- Coordinated 50+ frontline personnel across multiple service zones

Education

Bachelor of Arts - Rowan University, Political Science

Glassboro, NJ

- Concentration in Political Science. Final GPA: 3.80 (Cum Laude). Completed a Strategic Simulation Project, improving team performance to 2nd out of 8 by optimizing resource allocation, operational flow, logistics, and coordination in a constrained system.

Soft skills: Customer service, Verbal communication, Written communication, Interpersonal communication, Problem solving, Attention to detail, Escalation judgment, Task prioritization, Self-directed troubleshooting, Team collaboration, Training and mentoring, Process improvement

Military Service

U.S. Army Reserve, 68W Combat Medic

Oct 2011 – July 2020

- Developed and delivered training curriculum for an 8-person medic team, enhancing medical response capabilities and procedural compliance.
- Completed timed medical assessments in approximately 35% of allotted time while maintaining accuracy and performance standards in high-pressure environments.

Projects

AI Job-Application Pipeline

- Built a modular Python-based job-application pipeline for job discovery, scoring, resume tailoring, and application tracking — demonstrating practical automation, API usage, and workflow design.
- Impact: Shows the same support habit brought to service desk work: spotting repeated friction, documenting it, and improving the workflow.
