Summary

Results driven Operations and Project Manager with a proven track record managing multi department teams, complex logistical operations, and high stakes projects across both civilian and military environments. Former Army Reservist experienced in large scale disaster readiness planning, cross agency coordination, and rapid response deployments. Skilled at optimizing operational flow, supervising high volume teams, and maintaining safety and compliance in fast paced settings. Adept at resource allocation, scheduling, and hands on field oversight, with a focus on delivering projects on time, within scope, and under budget. Combines practical mechanical knowledge with strategic leadership and exceptional problem solving abilities.

Skills & Abilities

Project Management & Coordination

- Multi Team Leadership & Cross Department Coordination
- Scheduling, Task Prioritization, and Operational Flow Optimization
- Resource Allocation & Logistics Coordination (Civilian & Military)
- Preventive Maintenance Scheduling & Fleet Readiness Oversight
- Incident Response Planning & Emergency Readiness Support

Communication & Client Relations

- Cross Agency Liaison Experience (Military & Civil)
- Team Training, Development, and Performance Coaching
- High Pressure Communication, Briefing, and Status Reporting
- Conflict Resolution & Personnel Retention Strategies

Technical & Field Operations

- Basic Mechanical Servicing (Oil, Tires, Filters, Equipment Checks)
- Compressed Air System & Mechanical Systems Troubleshooting
- Waste Management & Disposal Compliance (Civilian & Military Contexts)
- Inventory Control, Vendor Coordination & Supply Chain Oversight

Administrative & Analytical Skills

- KPI Tracking, Operational Reporting & Data-Driven Decision Making
- Microsoft Office Suite (Excel, Word, PowerPoint)
- Documentation & Compliance Reporting
- Cost Management Awareness (Labor, COGS, Resource Efficiency)

Education

Rowan University — Glassboro, NJ
Bachelor of Arts in Political Science, Cum Laude
GPA: 3.8

Experience

Operations Manager — Beat the Bomb

SEP 2024 – CURRENT

- Directed daily multi department operations across facility maintenance, technical troubleshooting, and personnel management, supervising 20–30 team members on shift in a high reliability, safety driven environment.
- Coordinated preventive maintenance cycles on compressed air systems, mechanical components, and integrated technology systems, minimizing downtime and ensuring operational readiness.
- Managed site wide safety protocols including emergency response planning, hazardous waste disposal oversight (bio waste, contaminated materials), and OSHA compliant practices.
- Oversaw vendor relations, inventory procurement, and backend supply chain operations for facility critical equipment and materials, ensuring cost efficiency and resource availability.
- Implemented cross functional coordination between technical teams, logistics staff, and frontline operators, improving throughput efficiency and reducing operational disruptions.
- Contributed to incident reporting, root cause analysis, and the development of operational improvements tied to safety, quality control, and process standardization.

Operations Manager- 1-800 Got Junk

MAR 2019 – JUN 2021

- Managed daily logistics and multi region field operations, overseeing scheduling, routing, and productivity of 50+ frontline personnel across multiple service zones.
- Coordinated fleet readiness and maintenance cycles, conducting inspections, overseeing minor mechanical servicing, and ensuring vehicle compliance for a large operational fleet.
- Directed waste stream compliance, overseeing proper material segregation (e waste, recyclables, hazardous items), ensuring adherence to municipal and state disposal regulations.
- Developed operational workflows to improve route efficiency, reduce overhead costs, and meet key performance targets related to throughput, customer satisfaction, and safety.
- Trained and mentored frontline teams on safety protocols, customer service standards, and logistical best practices, resulting in improved service scores and reduced incident rates.
- Collaborated with cross functional leadership on resource deployment, scheduling optimization, and crisis management responses for high demand service periods.

U.S. Army Reserve (CBRN Defense Unit) |

OCT 2011 – JUL 2020

- Supported national disaster response planning in a command and control capacity, contributing to multi agency coordination efforts designed to respond when FEMA and National Guard resources were overwhelmed.
- Assisted in the development of large scale logistical staging, including planning for triage sites, evacuation routes, transportation logistics, and resource deployment for mass casualty and CBRN (Chemical, Biological, Radiological, Nuclear) scenarios.
- Conducted real time operational tracking and coordination during field exercises, ensuring smooth communication flow between military command, civil agencies (hospitals, EMS, logistics providers), and field units.
- Managed vehicle readiness and maintenance for tactical fleets, including Light Medium Tactical Vehicles (LMTVs), ensuring operational readiness during rapid deployment.
- Cross trained junior personnel in hazmat handling, decontamination procedures, and CBRN response protocols, increasing unit wide efficiency and readiness.
- Participated in multi agency drills and live exercises, contributing to after action reviews and continuous improvement of emergency response frameworks.
