

CARLOS ROMAN-CONVILLE

Operations & Systems Lead | Automation | Technical Infrastructure

cromanconville@gmail.com | 8563979706 | Philadelphia PA

SUMMARY

Technical Operations Manager with a hands-on background in diagnosing and fixing live systems under pressure — networked RFID, DMX lighting, camera/CCTV, Dante audio, and Arduino-based game controllers in a high-volume immersive venue. Combat medic discipline applied to technical systems: diagnose fast, document what worked, train the next person. Currently extending into software with Cursor and n8n for automation and internal tooling.

WORK EXPERIENCE

Technical Operations Manager, BEAT THE BOMB

Sep 2024 – Mar 2026

- Owned end-to-end technical operations for a high-traffic immersive venue — Arduino-based RFID, DMX lighting, networked CCTV, Dante audio, OBS/Elgato streaming, interactive laser systems, and NUC game servers.
- Resolved live incidents across the stack under guest-facing time pressure: network/IP debugging, config tuning across .env, JSON, and keyword-driven parameters; RustDesk remote admin; mid-operation hardware swaps (cameras, TVs, RFID); mechanical repair; and physical-system calibration (e.g., tuning fog output for game-effect consistency).
- Authored SOPs and debugging guides codifying each failure category's fix path — enabling junior staff to resolve incidents without escalation and reducing time-to-recovery.
- Coordinated internal automation pipeline development and optimized guest transition protocols, reducing average wait times 75% (10 → 2.5 min) and increasing throughput.

Operations Manager, 1-800-GOT-JUNK

Mar 2019 – Jun 2021

- Managed vendor logistics and dispatch operations, optimizing routing, scheduling, and service completion efficiency.
- Reduced lost-job rates ~15% by improving pricing negotiations and route coordination, increasing job acceptance and completion rates.

68W Combat Medic U.S. Army Reserve – 338th Medical Brigade

Oct 2011 – Jul 2020

- Developed and delivered training curriculum for 8-person medic team, enhancing medical response capabilities and procedural compliance.
- Completed timed medical assessments in ~35% of allotted time while maintaining accuracy and performance standards in high-pressure environments.

EDUCATION

Bachelor of Arts in Political Science

Rowan University

- Political Science
- Final CGPA: 3.80

TECH STACK

- Systems: Arduino, RFID, DMX, NUCs, AV Systems
- Software: SQL, OBS, Elgato, Salesforce, SAP
- Collaboration: Slack, Notion, Google Workspace
- Infrastructure: Networking, CCTV, Multimedia Systems

KEY SKILLS

- System Troubleshooting & Root-Cause
- Network Debugging (IP/DNS/Ethernet)
- Hardware Triage, Repair & Calibration
- Remote Systems Admin (RustDesk)
- SOP & Technical Documentation
- Automation Pipeline Design
- Cross-Functional Coordination
- Vendor Logistics
