

Carlos Roman-Conville

cromanconville@gmail.com | (856) 397-9706 | Philadelphia, PA

Summary

Junior Systems Administrator with ~2 years of hands-on experience supporting Linux servers, networked AV/control infrastructure, and end-user devices in a high-uptime production environment. Background in operations management and military medic training brings strong incident response, SOP discipline, and cross-functional coordination skills. Comfortable with TCP/IP and DNS troubleshooting, remote administration, hardware lifecycle, and ticket-driven support work. Actively expanding into scripting and infrastructure automation.

Experience

Sysadmin / Technical Operations Manager, BEAT THE BOMB – Philadelphia, PA Sept 2024 – Mar 2026

- Administered Linux (Photon OS) game-host servers and ~30 Intel NUC kiosks across the venue floor — package management, log analysis, runtime config tuning via .env / JSON files.
- Diagnosed and resolved TCP/IP and DNS issues across a converged production network carrying CCTV, RFID readers, DMX lighting, Dante audio, and OBS streaming traffic.
- Operated a fleet of remote endpoints with RustDesk and SSH; performed unattended hardware swaps, firmware refreshes, and component replacements (servers, cameras, displays, capture cards).
- Provided Tier 1/2 support for staff and guest-facing iOS, Android, and Windows devices — account resets, peripheral pairing, network re-association, and triage handoff to the dev team.
- Authored SOPs, runbooks, and troubleshooting trees that cut new-tech onboarding from ~2 weeks to ~5 days and reduced repeat-incident escalations.
- Coordinated cross-functional development of an internal automation pipeline — replaced a manual processing workflow and freed ~10 hours per week of supervisor time.
- Optimized guest transition protocols, reducing average wait time 75% (10 min → 2.5 min) and increasing per-shift throughput.
- Trained and supervised 8-person technical operations team on systems uptime, incident escalation, and venue-wide tooling.

Assistant Operations Manager, 1-800-GOT-JUNK – South Jersey, NJ Mar 2019 – June 2021

- Managed dispatch operations and vendor logistics — routing, scheduling, and service-completion tracking for a multi-truck regional franchise.
- Reduced lost-job rates ~15% through pricing-negotiation and route-coordination process improvements.

68W Combat Medic, U.S. Army Reserve, 338th Medical Brigade – Fort Totten, NY Oct 2011 – July 2020

- Multi-agency disaster response planning and high-pressure incident coordination over an 8-year tenure (HAZMAT-designated unit).
- Developed and delivered training curriculum for an 8-person medic team — clinical procedures, equipment readiness, and rapid-decision protocols.

Education

Rowan University, BA in Political Science – Glassboro, NJ

Sept 2014 – May 2018

- GPA: 3.80 / 4.00

Technical Skills

Operating Systems: Linux (Photon OS, Ubuntu basics), Windows 10/11

Networking: TCP/IP troubleshooting, DNS resolution, switch/router triage, CCTV networks, Dante audio routing, network cabling

Hardware: Server rack maintenance, Intel NUC deployment, peripheral replacement, RFID hardware, capture cards (Elgato)

Remote Administration: RustDesk, SSH, RDP

Scripting & Config: Bash (basics), Python (learning, building this job-pipeline), JSON / .env config tuning, SQL queries

AV & Streaming: OBS Studio, Elgato capture, DMX lighting control, Dante audio

Business Systems: Salesforce CRM, SAP, Slack, Notion, Google Workspace

Documentation: SOPs, runbooks, troubleshooting guides, incident reports

Projects

AI-Powered Job Application Pipeline

2025–present

- Personal Python project — automated ingest from 10+ job boards (Greenhouse, Lever, USAJobs, JobSpy aggregator, RemoteOK, etc.), LLM-driven posting triage with multi-stage scoring (heuristic + ATS overlap + domain fit + seniority + location policy), Postgres-backed state machine, FastAPI + Streamlit UI.
- Built with Cursor + Claude Code as primary development tooling — exposure to LLM API integration, prompt engineering, OAuth flows, and Postgres schema design.
